 - Cassandra Greisen MPP

Overview

- Two parts:
 - Introduction to the Maryland Collaborative
 - **Case study of how we work to bring about environmental change**

Effective Best Practices Include...

- Social Host Ordinances
- Multi-component interventions with community mobilization
- Restricting alcohol marketing
- Compliance checks for alcohol outlets
- Enforcing false ID laws

5 Steps to Environmental Change

1. Form campus-community coalitions
2. Identify high-risk drinking “hot spots”
3. Choose a best practice strategy to address those “hot spots”
4. Work together to implement the strategy
5. Evaluate outcomes

Identified Environmental Strategies

Local Social Host Ordinance

- Frostburg State University
- Johns Hopkins University
- Towson University
- Goucher College
- UMBC
- UMES

Enhanced Enforcement

- Loyola University
- McDaniel College
- Naval Academy

Landlord Lease Agreements

- Allegany College

Campus Alcohol Policies

- Collected all publicly available policies via web
- Analyzing each campus' alcohol policies for:
 - Clarity
 - Accessibility
 - Effectiveness
- Delphi Panel of experts rating 38 policies and 13 consequences for effectiveness
- Will classify policies according to effectiveness and provide feedback to campuses

Governance Council Activities

- Presidents of the Maryland Collaborative were instrumental in passing legislation:
 - To ban the retail sale of extreme-strength alcohol (190-proof and stronger) in Maryland
 - To get a 2-year moratorium on the retail sale of powdered alcohol in Maryland

Environmental scans

- Developed nine scanning instruments to collect data in off-campus and on-campus environments that can contribute to high-risk drinking
- Provide detailed information that can be used to identify evidence-based strategies well-suited to address problems and/or support existing policies
- Towson and Annapolis outlets near member campuses scanned by students

THE MARYLAND COLLABORATIVE
TO REDUCE COLLEGE DRINKING AND RELATED PROBLEMS

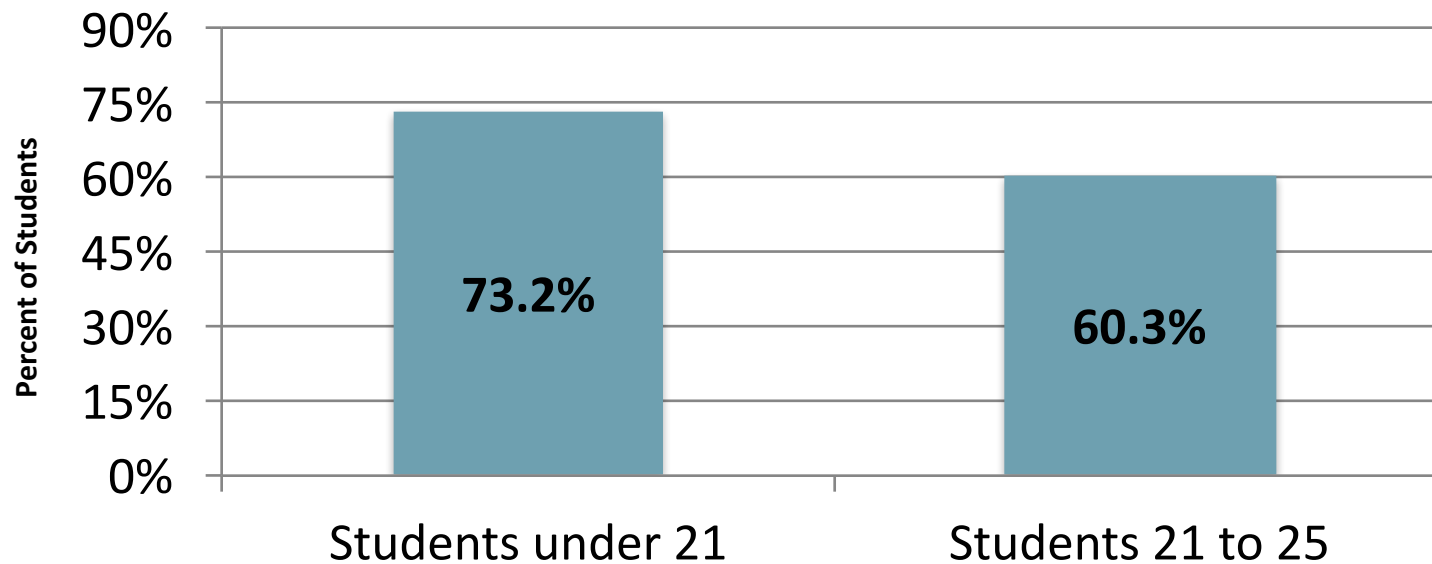

Case Study: Environmental Change

- **Hotspots**
 - Identify the environments where excessive drinking is occurring
 - Social vs. Commercial settings
- **Evidence-based Approach**
 - Identify a best practice approach to addressing that environment to reduce and/or prevent excessive drinking

Hotspot for high-risk drinking

Percentage of past-month drinkers who drank at least once in the past month at an off-campus house party. (MD-CAS)

Social Host Policies

A tool to reduce college drinking
and loud and unruly social
gatherings

Why SHO are effective

Theory of Deterrence

1. Swift
2. Certain
3. Severe

Evidence of effectiveness

- Fewer police calls for service related to disturbances
- Adolescents are less likely to drink in large peer groups

How they work

1. Allow law enforcement to write *civil* citations, similar to traffic tickets, to the property owners, property managers and/or hosts of loud and unruly parties;
2. Levy a fine for a first offense and fines increasing in severity for subsequent offenses at the same location;
3. Can enable local governments to recover costs for repeated law enforcement or other emergency service responses to a property.

10 Policy Advocacy Steps

1. Develop a policy action statement
2. Engage enforcement
3. Collect data to establish a legal basis
4. Make your case
5. Draft policy language
6. Use media advocacy
7. Mobilize support and provide community education
8. Get the policy adopted
9. Ensure enforcement of the policy
10. Evaluate campaign effectiveness

Step 1: Develop a Policy Action Statement

The Baltimore City Council will pass a civil Social Host Ordinance holding accountable those who host and allow loud and unruly parties to persist.

Step 2: Engage Enforcement

- Include enforcement from the beginning to help:
 - Collect local data
 - Identify local conditions
 - Select policy response(s)
 - Draft policy language

Step 2: Engage Enforcement

Baltimore City +++	Baltimore County ++	Princess Anne +++
Support from upper command, Commissioner's top advisors supportive	Support from lower command, Chief was not supportive	Support from upper command, Chief was supportive
Provided testimony at public hearing	Helped design policy, encouraging community service in addition to fines	Provided testimony at public hearing

Step 3:

Compile Relevant Data

Compile appropriate data to:

- Substantiate and define the local conditions and its consequences in the community
- Establish an evidence base for the proposed policy solution
- Using both quantitative and qualitative data

Step 3: Compiling Data

Baltimore City ++	Baltimore County +++	Princess Anne +
<p><u>Qualitative data</u></p> <ul style="list-style-type: none"> - Quotes from neighbors - Pictures <p><u>Quantitative data</u></p> <ul style="list-style-type: none"> - Data provided by city universities, including neighborhood calls for service - Consumption data 	<p><u>Qualitative data</u></p> <ul style="list-style-type: none"> - Quotes from neighbors, law enforcement - Pictures <p><u>Quantitative data</u></p> <ul style="list-style-type: none"> - Police calls for service from enforcement - Neighborhood complaint, alcohol transports and consumption data form university 	<p><u>Qualitative data</u></p> <ul style="list-style-type: none"> - Pictures <p><u>Quantitative data</u></p> <ul style="list-style-type: none"> - Police calls for service form enforcement - Consumption data for college by university

Excessive Drinking & Consequences

THE MARYLAND COLLABORATIVE
TO REDUCE COLLEGE DRINKING AND RELATED PROBLEMS

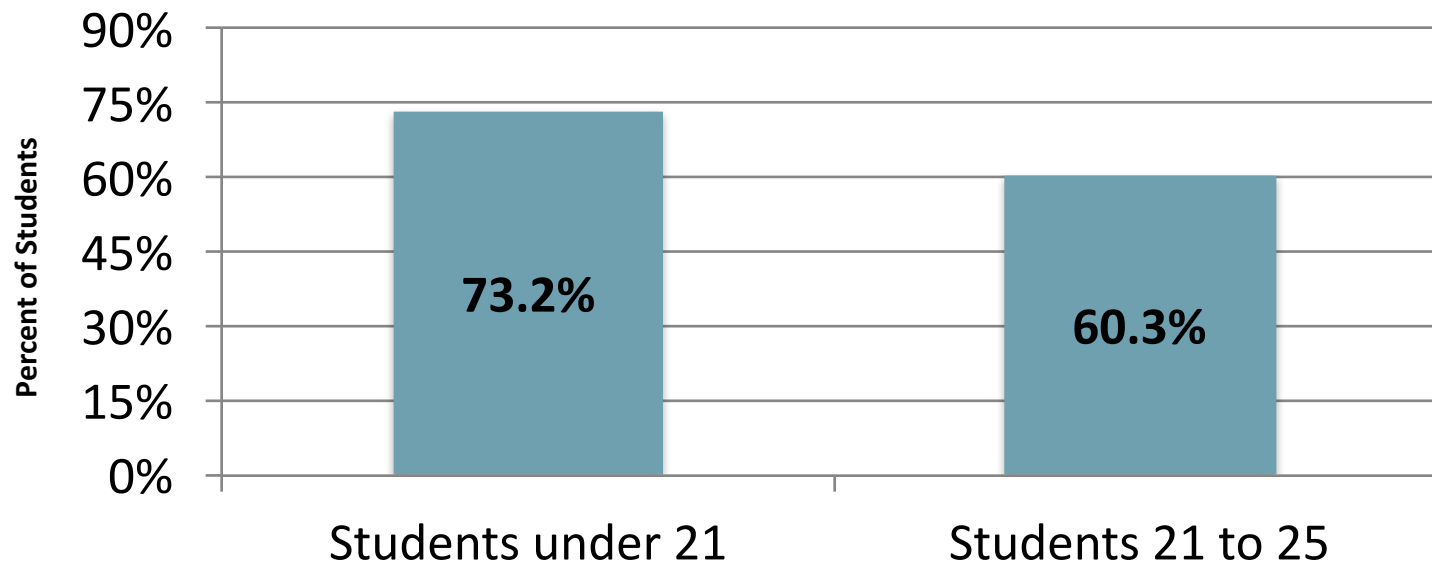

Nuisances and Noise

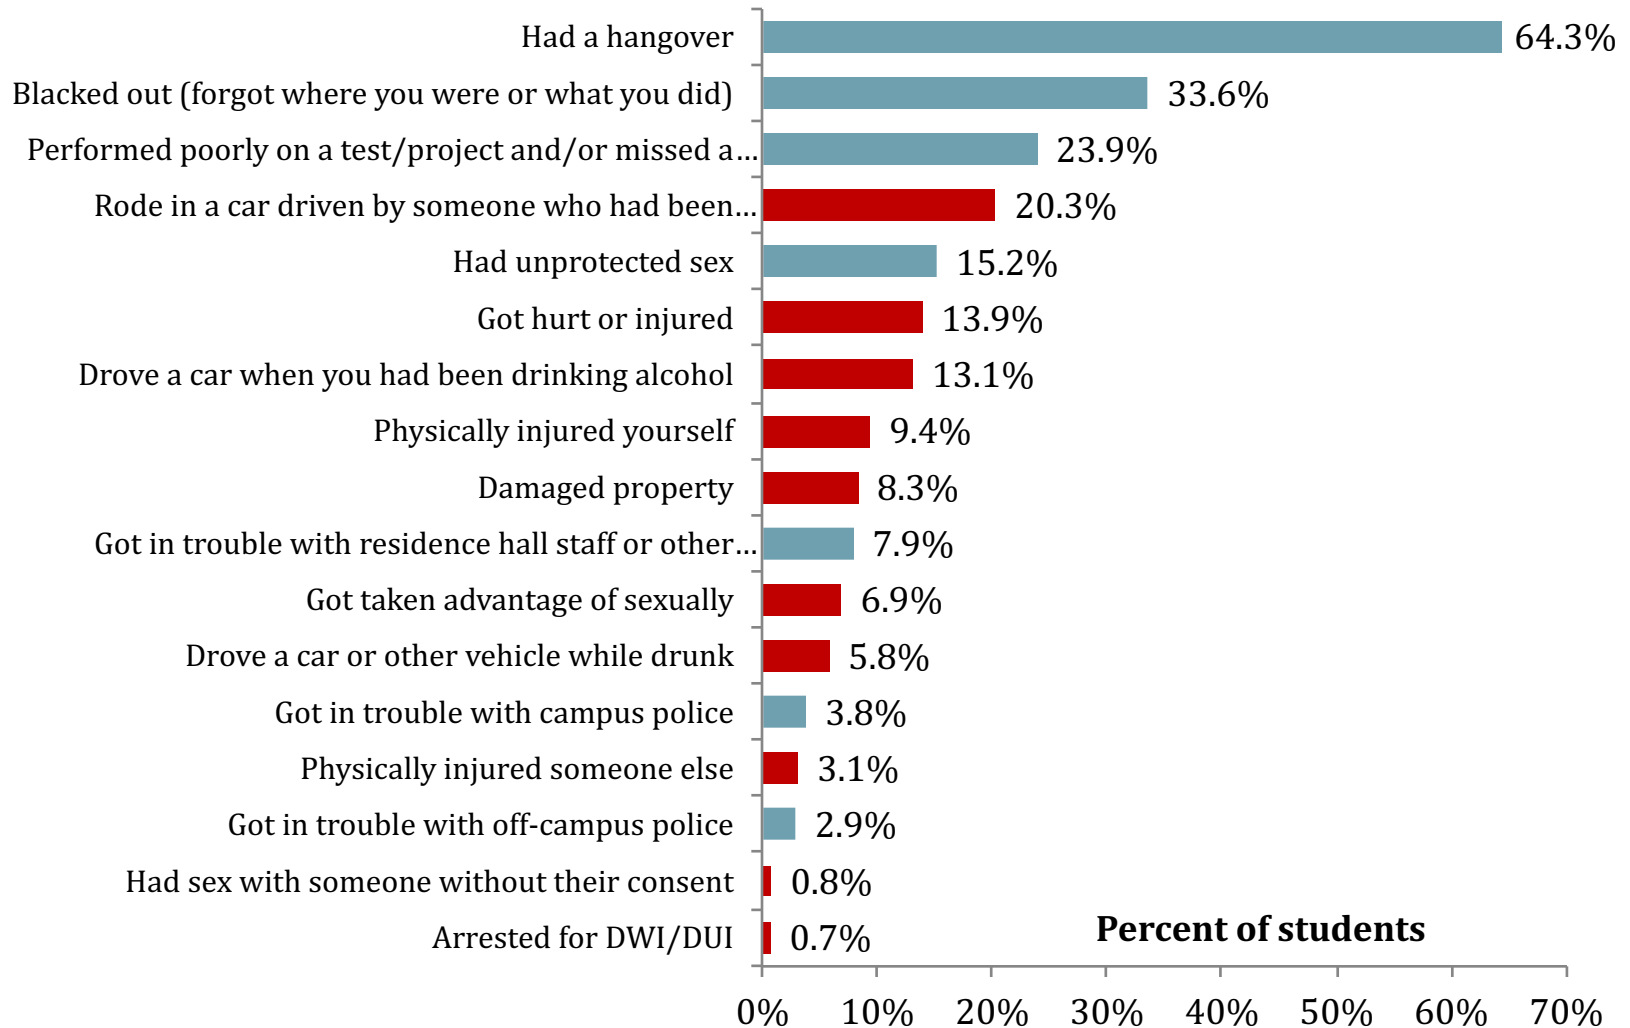

THE MARYLAND COLLABORATIVE
TO REDUCE COLLEGE DRINKING AND RELATED PROBLEMS

High-risk drinking Hotspots

Percentage of past-month drinkers who drank at least once in the past month at an off-campus house party. (MD-CAS)

Alcohol-related Consequences

Step 4: Making Your Case

Create an *Issue Brief* that:

- Describes the problem and its impact on the community
- Identify costs to community if problem is not resolved
- Explain how the proposed policy addresses community concerns
- Identifies ways for community members to get involved

Baltimore County Social Host Ordinance

- Most of the alcohol young people drink occurs on occasions.¹¹
- Nearly half of Maryland college students (and under 21) binge drink during similar to the national average.¹²
- Binge drinkers do so often; approximately 14% of students who drink in the past month drank 14 or more times in a month.
- Among past month drinkers, the number of drinks is 8 for males and 6 for females.

Overview

Excessive alcohol use among underage and college students is a serious public health issue. Despite the minimum legal purchasing age of 21, young people aged 12 to 20 drink. 11% of the alcohol consumed in the U.S. in 2002.¹³ Youth who begin drinking before the age of 15 are five times more likely to have an alcohol problem,

including dependence, motor vehicle crashes or violence, later in life than those who wait to drink until they are 21.¹⁴ The younger a person is when they start drinking, the greater their risk for excessive drinking in college.¹⁵ While we have made great progress in reducing drinking among high school students in recent years,

there has been a decline in reduced college drinking. CDC data shows that alcohol use among college students is still a problem. Pregnant women who drink before the age of 21 are more likely to have a child with a birth defect. Drinking more than two hours

Access & Availability

Young people across the nation report alcohol is easy to get from social settings (noncommercial sources of alcohol, often private parties), as well as bars and liquor stores.¹⁶ And the same is true in Maryland: over 90% of college students reported that alcohol was either easy or very easy for someone under 21 to obtain.¹⁷ Reducing young people's ease of access to alcohol, in both social and commercial settings, is a critical step to addressing excessive drinking among college students.

ISS

The Baltimore City Safe and Quiet Neighborhoods Ordinance

The Problem: Loud and Unruly House Parties

Crowds blocking the street and sidewalk, public urination, vandalism, loud music playing all hours of the night, littering, sexual assaults and fights – these are some of the problems neighbors in Baltimore City experience as a result of loud and unruly house parties. These quality of life issues and resulting decreased property values are major sources of frustration for residents living in neighborhoods with party houses.

Neighborhood residents are not the only ones whose health and safety are compromised as a result of these parties. Too often, young people engage in excessive drinking, which can lead to a range of alcohol-related problems, including sexual assault, drinking and driving and violence¹ as well as other consequences such as blackouts, vomiting and alcohol poisoning.

In Maryland, students who drank at an off-campus party in the past month were more than 1.5 times as likely to ride with a drinking driver, be taken advantage of sexually, have unprotected sex, or have sex with someone without their consent, compared to those who did not drink at an off-campus party.²

"On our way to church this morning, my wife and I were struck by the sight of several bright red plastic cups strewn in the street... it was clear that serious drinking is taking place in that house by the beer bottles and cans that were strewn all over the front porch and steps..."

Many student tenants have had a history of drunken, sloppy behavior that have made life difficult for those of us who simply want a quality life in a quiet neighborhood."

Baltimore City Resident

A Possible Solution:

A Safe and Quiet Neighborhoods Ordinance

COMMUNITIES ACROSS THE COUNTRY have responded to these problems with local ordinances to support safe and quiet neighborhoods. Also known as "social host ordinances," in Baltimore City such an ordinance can:

- Allow the police to write civil citations, similar to traffic tickets, to the property owner, property manager and/or host of loud and unruly parties;
- Levy a \$500 fine for a first offense, and a \$1,000 fine for subsequent offenses within a 12 month period;
- Do away with the burdensome administrative requirements of the current Neighborhood Nuisance law;
- Make law enforcement's job easier, making the law more effective, and making neighborhoods safer, healthier, and more enjoyable for all.

July 2015

Parties . . .

and college students is a serious problem. Among college students have risky sexual behaviors, and

underage drinking, drinking by age drinking" refers to having or more for females, in about

alcohol is easy to get from (alcohol, often private parties),

5 students reported that alcohol Reducing young people's access to settings, is a critical step to college students.

1 and 55% between in off-campus party

THE MARYLAND COLLABORATIVE
TO REDUCE COLLEGE DRINKING AND RELATED PROBLEMS

Step 5: Policy Language

Draft policy language

- Research similar policy examples from other communities
- Tie to local conditions
- Clarify legal basis
- Compile supporting documents (case law, etc..)
- Control the language
- Work with the City Attorney/County Counsel

Step 5: Policy Language

Baltimore City +++	Baltimore County +++	Princess Anne +++
<ul style="list-style-type: none">- Provided model language- City bill drafter inserted into Baltimore City code	<ul style="list-style-type: none">- Provided model language to legal public health expert who integrated into Baltimore County code- County bill drafter did final touches, amendments	<ul style="list-style-type: none">- Provided model language to legal public health expert who integrated into Princess Anne's code- Town Attorney did final touches, amendments

Step 6: Work with Media

- Framing for Content
 - Messaging and core values
 - Accountability for students and property owner,
 - Safety of students
 - Protection of tax payers
- Framing for Access
 - Op-eds, letters to editor, news releases, news conferences

Step 6: Work with Media

Baltimore City +	Baltimore County +++	Princess Anne ++
<ul style="list-style-type: none">- One print news story	<ul style="list-style-type: none">- Two print stories- One editorial- Two TV stories	<ul style="list-style-type: none">- Four print news stories

Step 7: Community Organizing

Community organizing involves a “top down” and “bottom up” approach that includes:

- Engaging policy makers and “influencers” using a Power Analysis
- Mobilizing “grasstops” support & providing community education

Power Analysis

Assess the Individuals Who Can Give You What You Want

Who has the power to adopt your policy?

Who are the most important individuals?	Who must you talk with before you approach the him/her?	How do you influence them if they are elected officials?	What is the self-interest of each?	Who will approach this person?

Step 7: Community Organizing

Baltimore City +++	Baltimore County ++	Princess Anne ++
<ul style="list-style-type: none">- Top-down approach<ul style="list-style-type: none">- University support- Neighborhood support- BCPD support- City administration supportive	<ul style="list-style-type: none">- Bottom-up approach<ul style="list-style-type: none">- Strong neighborhood support, led organizing- University neutral- County administration opposing- BCPD neutral	<ul style="list-style-type: none">- Top-down approach<ul style="list-style-type: none">- University staff led organizing to bring policy solution to city leadership- City leadership, police carried it- Minimal community support- University ambivalent

Step 8:

Get the Policy Adopted

- Collaborative members prepare presentation to decision makers
- Use the talking points and “frame” developed in the issue brief and used in the media advocacy
- Know which decision makers support or oppose your policy before making presentation

Step 8: Policy Adoption

Baltimore City +++	Baltimore County ++	Princess Anne ++
<ul style="list-style-type: none"> - Passed June 2015 <ul style="list-style-type: none"> - 2 years to adopt - Legislation <ul style="list-style-type: none"> - \$500 for 1st offense, \$1000 for 2nd and sub - 12-month look back period for enhancement - Holds host and landlords accountable - Can give warning, but don't have to - Affirmative defense 	<ul style="list-style-type: none"> - Passed January 2016 <ul style="list-style-type: none"> - 3 years to adopt - 2 introductions (8/15, 12/15) - Legislation <ul style="list-style-type: none"> - \$500 for 1st offense, \$1,000 for 2nd and sub offense - 24-month look back period - Tied to rental permit - Holds host and landlords accountable - Must give warning first to host and landlord - Affirmative defense - Only in 2 geographic areas by universities, only for 6-unit dwellings or fewer, 2-year pilot program, 	<ul style="list-style-type: none"> - Passed April 2016 <ul style="list-style-type: none"> - 3 years to adopt - Legislation <ul style="list-style-type: none"> - \$500 for 1st offense, \$1000 for 2nd and sub - 12-month look back period for enhancement - Holds host and landlords accountable - Can give warning, but don't have to - Affirmative defense <ul style="list-style-type: none"> *lose if you have 3 or more offenses in 12 months

Step 9:

Ensure Policy Enforcement

- Analyze potential barriers to enforcement after policy is passed
- Collaborate with law enforcement to develop potential solutions to barriers in order to ensure that the policy will be implemented and enforced after passage
- Determine ways to bolster enforcement efforts with Collaborative and community support

Step 9: Ensure Policy Adoption

Baltimore City +++	Baltimore County +++	Princess Anne +++
<ul style="list-style-type: none">- Engaged enforcement early, invested to enforce- Multiple meetings with enforcement to discuss implementation strategy- Tracking appeals through courts	<ul style="list-style-type: none">- Engaged enforcement early, invested to enforce- Held meetings with precinct captains to discuss implementation- Created spreadsheet to help track cases- Report quarterly	<ul style="list-style-type: none">- Engaged enforcement early, invested to enforce- Meetings need to be held to discuss tracking cases<ul style="list-style-type: none">- Just went into effect recently

Step 10: Evaluation

- Evaluate campaign effectiveness
 - Passage of policy
 - Implementation & enforcement of policy
 - Collaborative cohesiveness & momentum for future policy work
 - Change in norms & community discussion about alcohol-related problems
 - Foundation built for additional alcohol policies

Step 10: Evaluation

Baltimore City +++	Baltimore County	Princess Anne
40 citations issued first 7 months	TBD	TBD
24% reduction in calls for service	Must prove effective to keep ordinance	
Anecdotal evidence from community members		

Lessons Learned

- **Data are key, but only foot in the door**
- **Must have community support, multiple stakeholders**
 - University, parents, schools, law enforcement, churches, neighborhood associations, etc.
- **Allies and opposition change**
- **Relationships, relationships, relationships**
 - Luck = Preparation + opportunity
- **Flexible and creative**
- **Last man standing**

Barriers

- Access to legal expertise and technical advisor
- Policy adoption experience
- Relationships with community, enforcement, etc.
- Political will
 - City/County leadership, enforcement, etc.
- Powerful interests
 - Landlords, property owners

'Social host' ordinance is good step for El Paso

I graduated from high school in El Paso in 2010, and in my four years there, I watched too many of my peers be in danger at house parties where alcohol was easily available.

Too many parents turned their heads and hoped disaster would not happen. I think that El Paso can do better.

We were the first city in Texas that passed a smoke-free law and now we have the opportunity to pass the first civil "social host" ordinance in the state. I was so proud to be at the City Council meeting on April 19 when the council made it clear that they want a civil ordinance in El Paso.

No young person wants to lose one of their friends to an alcohol-related crash, fall or poisoning. I want to believe that I live in a city that does the right thing for its young people. I hope the city will pass this ordinance soon.

El Paso social host ordinance good idea

I am very pleased and proud of a City Council that recently voted unanimously to direct the city attorney "to research and implement a civil social host ordinance."

I am especially pleased that community partners have come together to protect the public health and safety of our youth to reduce underage drinking and to help in being the first to pass the social host ordinance in the state of Texas.

This opportunity will increase awareness about the dangers of house parties and assure parents that our youth are safe in parties that they attend. As a parent who experienced firsthand the trauma of having a child go through the ordeal of an underage drinking incident at a house party, I want assurance that parents are aware that they are responsible for making positive choices when youth are in their homes.

I do understand that as parents we are responsible and we cannot send mixed messages to our developing youth. We need to make our community aware that we do have an underage drinking problem because it is happening in our back yards.

Julie Priego
